

Big Science is a sector where cutting-edge research is performed, leading to the advance of knowledge. In the path of new discoveries, knowledge and technology are also improved in every step. These valuable assets can reach society in a direct way through the industry, thanks to processes known as Knowledge Transfer (KT) and / or Technology Transfer (TT).

During this workshop, the European Big Science facilities, projects and other key players will give their insights and share their experience in KT and TT.

The goal of this session is to establish a common forum to discuss about KT/TT in Big Science. Some of the questions that will be addressed are: what is being done in Europe, which are the main stoppers, and which are the Best Practices (based on experience)

KNOWLEDGE AND TECHNOLOGY TRANSFER IN BIG SCIENCE
